

The FOD 5504 Optical Switch is a unique handheld instrument for calibration sets and measurement automation.

Routine comparison with Master device procedures in calibration laboratories, can be simply performed with before unachievable repeatability. No more need to move fiber and connect it repeatedly. Fix cables on a table, only once clean and connect patchcords. All other may be done via instrument front panel (optional RS232).

The FOD 5504 may also be used as a shutter for zero set or for other changing light path in an optical scheme. The Switch is designed for SM application.

Protective rubber boot and soft carrying case included.

Specify adapter type under ordering. Changeable adapters: FC, ST, SC, Universal 2.5 mm , Universal 1.25 mm , LC.

RoHS Compliant

| SPECIFICATIONS | $\min$ | typ | max |
| :--- | :---: | :---: | :---: |
| Insertion loss, dB | - | 0.6 | 1.0 |
| Optical crosstalk, dB | -80 | - | - |
| Repeatability, dB | -0.05 | 0.003 | +0.05 |
| Return loss, dB | -45 | -50 | - |
| Switching time, msec |  |  |  |
| Durability, times | $<5$ |  |  |
| Battery lifetime, Hours | $100^{7}$ |  |  |
| Weight, g | 1000 |  |  |
| Dimensions, mm | $147 \times 74 \times 28$ |  |  |
| Operating temperature | -10 to $+50^{\circ} \mathrm{C}, 75 \%$ humidity non-condensing |  |  |
| Storage temperature | -30 to $+60^{\circ} \mathrm{C}, 75 \%$ humidity non-condensing |  |  |

APPLICATIONS

- Comparing with Standard
- Light path switching
- Shutter for zeroing
- Wavelength switching
- Using in linearity testing set

WARRANTY: 1 Year
